

Vinyl Windows and Patio Doors

The ENERGY STAR criteria for residential windows, doors, and skylights are tailored to four Climate Zones. A product's energy efficiency for a given climate is based on its impact on heat gain and loss in cold weather and heat gain in warm weather.

Climate Zones for ENERGY STAR Qualification Criteria

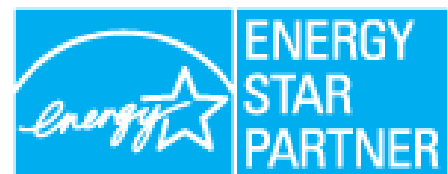

The four Climate Zones for ENERGY STAR qualified windows, doors, and skylights are:

- Northern: mostly heating
- North/Central: heating and cooling
- South/Central: cooling and heating
- Southern mostly cooling

Manufacturer's Certification Statement

Vinyl Kraft certifies that all exterior windows are eligible building envelop components and qualify for the Internal Revenue Code Section 25C tax credit, based on the following criteria as identified in the 2004 supplement to the 2003 International Energy Conservation Code (IECC). All windows in the Northern & North/Central and South/Central must use either Energy Kraft II, Energy Kraft 366 or Energy Kraft III glass packages to qualify for the 2009 - 2010 tax credit.
